

PRODUCT No. 4506

Double-housing tank – tank in a tank – 400 l

(Illustrative photograph)

Technical data

Material (Housing/tank)	Galvanized steel/HDPE
Capacity	400 l
Weight (without UN)	50 kg
Width	700 mm
Length	730 mm
Height	1170 mm

Attributes

- The housing is made of galvanized steel sheet.
- The inner tank is made of seamless high density polyethylene (HDPE).
- The hot-dip galvanized pallet is firmly connected to the tank and serves for trouble-free handling.
- Equipped with a double housing – it allows the user of tanks without a catching basin.
- Equipped with indicator of stored liquid level in the tank.
- Tank width allows handling in confined spaces.

Product purpose

- Designed for in-house use, for collecting of hazardous and water-endangering liquids.

Additions

- Version without international UN / ADR certification.
