

### PRODUCT No. 6669

#### Plastic measuring jar – profi

(Illustrative photograph)

#### Technical data

Material (jar/spout)	HDPE / LDPE
Material (protective lid)	Polypropylene (PP)
Capacity	5 l
Scale parts by	0,5 l
Weight	0,4 kg
Dimensions (L x W x H)	300 x 135 x 380 mm
Spout length	160 mm

#### Attributes

- Made of polyethylene and polypropylene.
- Equipped with flexible spout and practical lid.
- There is a scale on side of the jar in range of 0 – 5 l, divided by 0,5 l.
- Suitable for pouring and measuring of liquids, protective coatings, cleaning and antiseptic means, etc.
- Closure lid ensures higher cleanness of the content and eliminates the risk of pouring out when the vessel is tilted.

#### Colour variations

- Body and spout – white transparent / protective lid – grey (RAL 7011).

#### Product purpose

- Designed for pouring in and out and measuring of fluids.

#### Additions

- In case of use with aggressive liquid, we recommend to consult with the manufacturer.
- Suitable for food industry.
