

PRODUCT No. 6688

Digital flowmeter for pump – type 6687

(Illustrative photograph)

Technical data

Material (housing)	Aluminium
Flow	1 – 10 l/min
Nominal pressure	4 bars
Viscosity	20 – 2000 mPas
Outer thread	1"
Accuracy	+/- 1%
Medium temperature	-10 / + 40°C
Protection	IP 65
Weight	0,5 kg
Width	90 mm
Depth	60 mm
Height	130 mm

Attributes

- Housing of the flowmeter is made of aluminium.
- Equipped with a 2-line display.
- Indicator of current and total output.
- For internal enterprise delivery of fluids.
- Guaranteed difference +/- 1.

Product purpose

- Designed to measure current and total outflows in an enterprise environment.

Additions

- Can be ordered for a pump of type 6688.
- The flowmeter must not be used for combustible and explosive liquids of hazard classes A1, AII and B. AIII hazard classes shall not be used if these liquids are heated to a higher temperature than their flash point.
