

PRODUCT No. 7080

Pliers for barrels

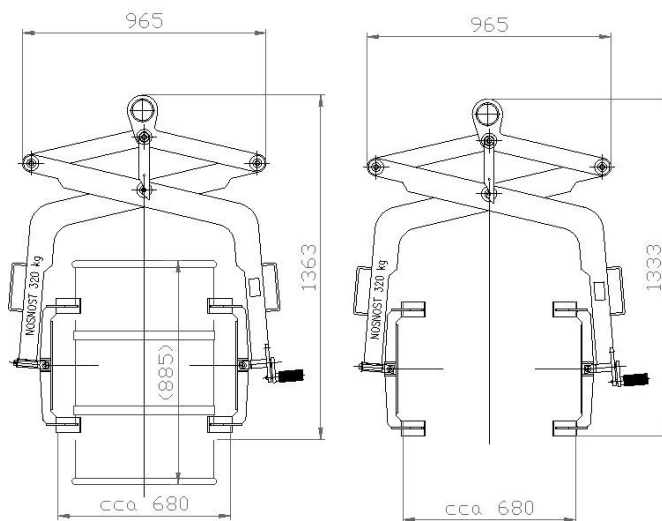

(Illustration photograph)

Technical data

Material	Steel
Weight	47 kg
Load capacity	320 kg
Max. lift	3 m
Width (approx.)	680 mm
Height	1363 mm
Burden (diameter/height)	572/885 mm

Attributes

- Made of steel / steel sheet.
- Attachment of barrels by pliers.
- Possible fixation of barrels in custom position – by crank.
- For barrels with max. 572 mm diameter and 885 mm height.

Color variations

- Yellow shade RAL 6200 (base layer S2000/0100 and top layer – synthetic paint 2300/0600 – yellow shade).

Product purpose

- Designed to handle with metal barrels in cases where handling in another way could be lengthy, difficult or dangerous.

Additions

- The pliers are compatible with steel barrels produced by Meva.
- Hang devices cannot be used when the barrels are significantly deformed and cannot be surely held.
- Pliers can be hung on a crane or other lifting device that has the required load capacity and is equipped with the appropriate hook.
