

PRODUCT No. 3882

Plastic dripping tub – 45 l

(Illustrative photograph)

### Technical data

Material	Recycled polyethylene (PE)
Capacity	45 l
Weight	2 kg
Width	1168 mm
Depth	406 mm
Height	139 mm

### Attributes

- Made of 100% recycled Polyethylene (PE).
- Chemically resistant seamless construction, does not corrode.
- Ribbing at the bottom of the tub increases rigidity in the event of leakage of substances, the liquids are not in contact with the container.
- Light weight, easy to carry.
- In case that the tub are not in use, it is possible to stack them into one another (only tubs of the same size).
- Applicable in temperature range from -34°C to +49°C.

### Color variations

- Standardly black.

### Product purpose

- Designed for containment of liquid leakages from smaller containers.
