

PRODUCT No. 7599

Folding membrane sewer stopper – 750 x 630 x 0,9 mm

(Illustrative photograph)

Technical data

Material	Isotropic magnetic foil / PUR / PES / PVC
Capacity	1,5 kg
Width	750 mm
Depth	630 mm
Height	0,9 mm
Package dimensions	650 x 340 x 10 mm

Attributes

- Made of isotropic magnetic foil with permanent magnetic properties.
- Special flexible PUR foil and foil made of PES / PVC.
- Foil thickness is 0,9 mm.
- Usable at temperature range -20°C to +60°C – flexibility reduces at low temperatures.
- Suitable for steel grates.
- Can be used repeatedly on cleaned horizontal inlet with side drainage.
- Overlapping is possible when used.
- Resists to all commonly occurring chemicals.
- Works on the principle of the physical effect of pressure differences.

Color variations

- Black color with yellow edges.

Product purpose

- Designed for fast solving of emergency situations associated with leakage of dangerous liquids, even and clean surfaces.

Additions

- Foils does not work with plastic materials.
