

PRODUCT No. 0019

Truck for barrel

(Illustrative photograph)

### Technical data

Material	Steel
Weight (approx.)	19 kg
Load capacity	300 kg
Wheels (diameter)	With inner tube (260 mm).
Width	730 mm
Length	1500 mm
Height	400 mm

### Attributes

- Made of steel material.
- Barrel can be gasped from upright position and tilted horizontally and transported.
- Barrel can be easily rotated on the pulleys in a horizontal position and poured out of its content.
- Surface finish made by comaxite – common for all types, as well as barrel retainer.
- Version with two inner tube wheels which allows the truck to be handled even on uneven terrain.
- All barrel trucks are designed for transporting empty or full metal barrels only.

### Color variations

- Standardly red.

### Product purpose

- Designed for transportation of empty or full metal barrels.

### Additions

- Never exceed determined load capacity of the truck.
- Installed wheels - type 6022 (needle bearing, steel rim).
