

PRODUCT No. 0039

Double metal stand for bags

(Illustrative photograph)

Technical data

Material	Steel sheet
Capacity	2x 120 l
Weight	12,6 kg
Width	1130 mm
Depth	615 mm
Height	950 mm

Attributes

- Made of hot-dip galvanized steel sheet grade 11.
- The bin is designed as a four feet rectangular-shaped frame.
- The support part consists of three vertical columns – connected by upper and lower profiled hoops sets.
- The frame is reinforced in the upper part with a pressed metal strip – connected with both upper hoops and legs.
- The metal strip can serve as an advertisement placement.
- Two hinged lids are attached to the upper hoop using the bracket.
- Inside the upper profile as a flexible hoop – it serves to fasten polyethylene bags.
- Simple and quick snapping of bags allows easy handling of waste.
- Polyethylene bags can also be ordered – they are not included.
- All types have lids made of hot-dip galvanized sheet with a diameter of 462 mm.
- Suitable for outdoor use, eg. at parking lots and gas stations.

Product purpose

- Designed for attaching of polyethylene bag and collecting of common waste.

Additions

- Polyethylene bags are not included.
- Bags can be ordered – type 1077 (700 x 1100 mm).
