

Metal barrel with plugs – 200 l TYPE: B0443

Illustrational photograph

TECHNICAL DATA

| | |
|-------------------------------------|------------------------|
| Material | Galvanized steel sheet |
| Material thickness (bottom/housing) | 1,2 / 1,2 mm |
| Capacity | 200 l (± 3 %) |
| Weight | 20,5 kg (± 3 %) |
| Max. btto weight | 250 kg* |
| Plug (bottom) | 1x G2" |
| Venting plug (bottom) | 1x G3/4" |
| Finishing | Galvanized |
| UN code | YES |
| Dimensions (diameter x height) | 595 x 820 (± 3 mm) |

*Weight of barrel including filling

ATTRIBUTES

- The barrel is suitable for transport and storage of liquid substances.
- Stamping on the lid means approval for transport according to international regulations (IMDG, RID, ADR).
- The barrel is made of steel galvanized sheets.
- Housing is welded and strengthened with pressed stiffeners.
- Storing only in vertical position.
- The bottom and lid are connected with housing by multiple safety folding.
- A sealing substance is applied in the folding to provide tightness that is examined with each barrel.
- The filling opening is closed by a plug that can be secured by a protective cap with a tear-off strip. This ensures original condition of the packaging.
- Can be used multiple times, reconditioned and recycled.

PRODUCT PURPOSE

Designed for storing and transportation of all kinds of liquid substances.

ADDITIONS

Products No. 3247 and 0735 can be ordered – barrel plug openers.
