

PRODUCT No. 1280

Barrel tap – 2"

(Illustrative photograph)

### Technical data

Material	Polyethylene
Connection dimension	2"
Packing weight	0,2 kg
Use	Barrel 60 – 200 l
Main dimensions	2" x 165 mm

### Attributes

- Made of polyethylene (PE) plastic.
- The barrel tap allows the oil and water to be safely drained from the barrel in a horizontal position.
- The tap is obtained with a 2" thread for 60 and 200 l barrels.
- Rubber seal is included.
- Suitable for less demanding oil and water draining in a non-aggressive environment.

### Product purpose

- Designed for draining of liquids from barrels.

### Additions

- The tap is not made of antistatic material and is not suitable for alcohol.
