

PRODUCT No. 1282

Hand pump

(Illustrative photograph)

Technical data

Material	Nylon
Connection thread	2"
For barrels with capacity	216,5 l
Lift	350 ml
Output (approx.)	25 l/min

Attributes

- Made of Nylon material.
- The output of the plastic pumps is approximately 25 l/min.
- The 2" connecting thread is provided with a counter-nut to ensure a firm connection to the barrel.
- Telescopic suction tube for use in barrels with a capacity of 216,5 l, including barrels with plug in the casing.
- Telescopic suction tube consists of two parts of length 475 mm and 530 mm.
- Hand pump type 1282 is suitable for pumping organic solvents, diesel fuel, heating oil, etc.

Product purpose

- Designed for pumping liquids from barrels up to a capacity of 216,5 l.

Additions

- After use, the pump needs to be drained out of the liquid and flushed.
