

PRODUCT No. 3241

Manual gear pump

(Illustrative photograph)

Technical data

Material (sealing/pump)	NBR/Alu-cast-iron
Capacity	1 l/spin
Connection	G2"
For barrels	200/220 l

Attributes

- Made of NBR (rubber) material used for sealing and alu-cast iron used for pump.
- Rotary drum pump with higher capability and durability.
- Equipped with a movable locking nut.
- The pump is not suitable for pumping of acetone.

Product purpose

- Designed for pumping of gasoline, diesel fuel and oils with viscosity of SAE 140.

Additions

- Before using for pumping other aggressive liquids/acids, it must be discussed with the manufacturer.
