

Antistatic plastic barrel – 75 l  
TYPE: F3C\_3246\_0000

Illustrational photograph

### TECHNICAL DATA

Material (barrel and lid / gasket)	HDPE / EPDM
Capacity	75 l
Weight	4,2 kg
Inner opening diameter	354 mm
Diameter	410 mm
Height (with lid)	680 mm
Surface resistivity	$\leq 10^4$ Ohm
UN code	YES

### ATTRIBUTES

- Made of conducting high density polyethylene with a carbon-based additive.
- Protects explosive products from electrostatic discharge and helps to create a safe work environment.
- Equipped with screw-on lid with gasket and side handles.
- Barrel is in accordance with regulation requirements for use in areas with a risk of explosion.
- Used for storage and transport of loose, per piece or pasty flammable substances in the chemical, electrical or automotive industries.

### COLOUR VARIATIONS

Black.

### PRODUCT PURPOSE

Product is designed for storing and transportation of highly flammable materials, like granules, tablets or powder.

### ADDITIONS

Certified and labelled with UN code for storing and transportation of dangerous solid wastes.

Not suitable to be used in food industry.

Expiry date: 5 years from the date of manufacture.
