

PRODUCT No. 3146

Shelf rack with tray shelves

(Illustrative photograph)

Technical data

| | |
|--------------------------------|------------------------|
| Material | Galvanized steel sheet |
| Capacity of the tray | 11 l |
| Shelf load capacity | 150 kg (evenly loaded) |
| Max. load capacity of the rack | 600 kg |
| No. of shelves | 4 pcs |
| Width | 1000 mm |
| Depth | 305 mm |
| Height of the rack / tray | 2000 / 40 mm |

Attributes

- Made of galvanized steel sheet (whole rack).
- The rack is composed of construction of galvanized profiles and galvanized trays, which are impermeably welded.
- The racks are used especially for the storage of small containers with liquids.
- Smooth surface of the tray enables easy cleaning of eventual drippings – 1x tray – 40 mm height and 11 l capacity.
- The racks are assembled including stiffening angles and stabilizing feet, which guarantees higher stability and stiffness.

Product purpose

- Designed for storing of small containers with liquids in sheltered warehouses.
