

## PRODUCT No. 3148

### Large-area load capacity shelf rack

(Illustrative photograph)

#### Technical data

Material	Galvanized steel sheet
Shelf load capacity	250 kg (evenly loaded)
Rack max. load capacity	1000 kg
No. of shelves	4 pcs
Width	1500 mm
Depth	1050 mm
Height	2300 mm

#### Attributes

- Made of galvanized steel sheet with a base layer varnish.
- Used where heavy goods with large-area are stored.
- The rack is composed of columns and transverse supports which supports each shelf.
- Underlying bases are installed under the racks to gain better stability and load distribution for the rack.
- Higher stiffness of the rack is gained by insertion of the reinforcing angles.
- The surface finish of the rack structure is made of base paint layer and shelves are made of galvanized steel sheet.
- Suitable for storing of packed as well as bulk goods with higher weight in sheltered warehouses – careful storing.

#### Product purpose

- Designed for storing of packed as well as bulk goods with higher weight in sheltered warehouses.
