

PRODUCT No. 3150

Rack for storing tyres

(Illustrative photograph)

### Technical data

Material	Galvanized steel sheet
Shelf load capacity	150 kg (evenly loaded)
Max. load capacity of the rack	450 kg
No. of shelves	3 pcs
Width	1000 mm
Depth	430 mm
Height	2000 mm

### Attributes

- Made of galvanized steel sheet (whole rack).
- The rack is composed of galvanized profiles.
- The racks are used especially in tyre shops and services, warehouses, etc.
- Suitable for storing tires and wheel rims.
- The racks are assembled including stiffening angles and stabilizing feet, which guarantees higher stability and stiffness.

### Product purpose

- Designed for storing of tyres and wheel rims.
