

PRODUCT No. 4201

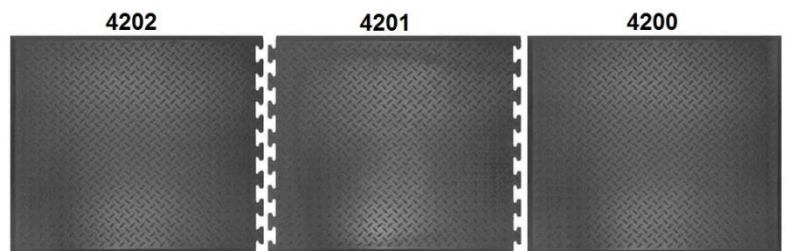

Anti-fatigue mat – Comfortlok 0,7 x 0,8 m

(Illustrative photograph)

Technical data

Material	SBR/25% Nitrile
Weight	5 kg
Color	Black
Surface (pattern)	„Diamond“
Operating temperature	-30°C / +50°C
Width	700 mm
Depth	800 mm
Height	12,5 mm
Version	2x ramp

Attributes

- Made of natural SBR rubber and 25% nitrile mixture.
- Material provides better resistance to oils and fats.
- Diamond shaped surface protects against slipping.
- Possibility to use the linking modules to create an arbitrary tread with length of 0,7 mm.
- Provides relief and comfort during long standing on one spot.
- Suitable for industrial areas such as production lines, separate welding stations, assembly lines, workshops, etc.
- Edges in form of a ramp with bevelled edge.
- In accordance with the anti-skid standard EN 13552 of category R9.

Color variations

- Black.

Product purpose

- Designed for dry operations for fatigue relief during long staying.
