

PRODUCT No. 4225

Parking barrier - galvanized

(Illustrative photograph)

Technical data

Material	Steel
Weight	11 kg
Surface finishing	Hot-dip galvanized
Width	800 mm
Depth	300 mm
Height	550 mm

Attributes

- Made of steel.
- The parking space can be secured with parking barriers.
- The barriers provide parking, pedestrian zones, parks or private spaces to prevent vehicles from entering.
- The steel structure is well protected against corrosion.
- In the upper part of the pole is a slatted lock with a flower against dirt access.
- The key is needed to release and tilt the barrier. It is locked automatically when it is in standing position.
- Easy installation on any solid surface.
- Equipped with reflective foil and rubber damper.

Color variations

- Hot-dip galvanized.

Product purpose

- Designed to secure determined area.
