

PRODUCT No. 3796

Loading ramp – 2,5 m (1 pc)

(Illustrative photograph)

Technical data

Material	Aluminium
Weight (pair)	46 kg
Load capacity (pair)	2375 kg
Max. elevation	750 mm
Ramp width	400 mm
Length	2500 mm

Attributes

- Made of aluminium.
- Suitable for loading heavy equipment.
- Equipped with an anti-slip surface to provide safety.
- Suitable for use in heavy industry, trade, construction, etc.

Lower ramp wedge shape profile:

- Beveled profile on both sides – allows low entry angle and maximum range of tilted ramp.
- With 3 mm high anti-slip protrusions.

Upper support profile:

- Optimized foot angle – suitable for transportation with low profile handling means.
- The foot allows a wide range of tilting (elevation).
- With 3 mm high anti-slip protrusions.

Product purpose

- Designed for loading heavy equipment.
