

PRODUCT No. 4265

Light sorption carpet, light – 970 mm x 44 mm

(Illustrative photograph)

Technical data

Material	Polypropylene
Sorption capacity (oil)	195 l
Packing weight	14 kg
No. of layers	1
Dimensions	970 mm x 44 mm

Attributes

- Made of polypropylene.
- Designed as an oil sorbent.
- Used for sorption of oils, petrol, diesel, solvents and other oil-based fluids.
- Due to its hydrophobic properties, it can be used to selectively separate oil from water.
- The product is not perforated.

Recommended use:

Sorption of oils, petrol, diesel, solvents and other oil-based fluids. Thanks to its hydrophobic properties, it can be used to selectively separate oil from water. They are also used in warehouse, manufacturing or repair operations to prevent the leakage of oil or to deal with an emergency situations in the case of sudden leakage of such substances.

Color variations

- White.

Product purpose

- Designed for sorption of oils, petrol, diesel, solvents and other oil-based fluids.

Additions

- If used for a particular chemical, consult the suitability of the product with the safety technician.
