

### PRODUCT No. 4624

### Plastic catching basin – for 4x 200 l barrels

(Illustrative photograph)

#### Technical data

Material	Polyethylene
Capacity	240 l
Weight	48 kg
Section max. load capacity	250 kg
Max. load capacity	1000 kg
Width	1400 mm
Depth	1400 mm
Height	270 mm

#### Attributes

- Made of highly resistant Polyethylene plastic by rotary moulding method.
- Robust and profiled construction ensures high mechanical resistance.
- The grates are removable – ensuring easy cleaning.
- Catching basins do not corrode and are not subject to weathering or UV radiation.
- Resistant to most chemicals.
- Equipped with pouches for handling by a fork-lift machinery (basin must be empty).
- Basins have low height and are fully recyclable.

#### Color variations

- Standardly – grate / basin – black / orange

#### Product purpose

- Designed to catch leakages of chemicals during emptying and filling of barrels.

#### Additions

- The dimensions of the catching basins may vary within range of +/- 1%.
- The catching basin for a particular chemical substance can only be recommended. Approval for a given chemical substance with a given concentration and its storage in a given environment may only be approved when the substance safety sheet is reviewed by a safety technician or a test facility.
