

PRODUCT No. 4697

Truck with easy start – 2300 kg

(Illustration photograph)

Technical data

Material	Steel/Polyurethane
Weight	63 kg
Surface finishing	Powder paint
Load capacity	2300 kg
Max. lift	200 mm
Fork length	1150 mm
Fork width	520 mm
Wheels (Control/In forks)	175x60/85x100 mm

Attributes

- Made of high-strengthened steel used for chassis and Polyurethane used for wheels.
- Truck reduces effort due manipulation with heavy pallets – by 70% compared to common types of trucks.
- The system works in both directions of movement – activation by a lever on the control handle.
- It works on principle of overcoming the inertia of heavy loads and facilitating work particularly at start and inequality.
- Easy and precise positioning of heavy loads.
- Smooth start on uneven surfaces and sills.
- Very ergonomic solutions which reduces arm, shoulder and back strain.

Product purpose

- Designed for transportation of heavy pallets (EURO format standard).

Additions

- Lifelong warranty for the frame.
