

PRODUCT No. 5002

Plastic barrel with removable lid – 220 l

(Illustration photograph)

Technical data

Material	High density Polyethylene (HDPE)
Weight	7,4 kg (+/- 4%)
Load capacity (cl. I / II, III)	320 / 480 kg
Capacity	220 l
Diameter	590 mm
Inner diameter of neck	470 mm
Height	975 mm
UN code	UN

Attributes

- The body and lid are made of Polyethylene with high density (HDPE).
- Clamping mechanism and lever are made of galvanized steel.
- Lid is removable by lever mechanism.
- Barrels can be stacked up to 2x full barrels (can be stacked up to 4 m of height according to ADR approval).
- Optimal shape for effective stacking and palletization.
- Equipped with UN number for storing and transportation of dangerous solid state waste.

Color variations

- Barrel (Blue), Lid (Black)

Product purpose

- Product is meant to be used for storing and transportation of dangerous waste in solid state.
