

PRODUCT No. 3780

Foldable aluminium ramp – 550 x 1000 mm

(Illustrative photograph)

Technical data

Material	Aluminium
Weight	38 kg
Load capacity	400 kg
Max. elevation	550 mm
Width	1000 mm
Length	2750 mm

Attributes

- Made of aluminium.
- Ideal solution for loading operation or barrier-free access.
- Especially for construction or logistics companies.
- Portable ramps offer efficient solutions with maximum safety and easy installation.
- The ramp is placed in the vehicle during transportation in a vertical position.
- The ramp is anchored to the vehicle's floor by a pair of clamps to allow easy assembly / disassembly without tools.
- Equipped with safety belts designed to provide a vertical position of the ramp during transportation.
- Equipped with rubber silentblocks to prevent the effects of shocks and vibrations during driving.
- Equipped with plastic handles for easy handling.
- Simple operation – handled by at least 1 person – low effort needed due to gas strut.
- Unfolding is done by unfastening the safety belts and unlocking the latches.

Product purpose

- Designed for loading operations or for wheelchair access.
