

### PRODUCT No. 6412

#### Undercarriage for manipulation – 1200 x 800 x 1000 mm

(Illustrative photograph)

#### Technical data

Material	Steel
Material thickness	3 mm
Weight (approx.)	18 kg
Load capacity	1000 kg
Wheels (diameter)	Polyamide (200 mm)
Load area (L x W x H)	1200 x 800 x 1000 mm

#### Attributes

- Made of steel with 3 mm thickness.
- Makes manipulation with pallets and boxes easier.
- All undercarriage is standardly equipped with two fixed and two turnable wheels with brakes.
- Increased load area secures easier manipulation and higher work safety.
- Surface finishing made by powder varnish.

#### Color variations

- Standardly blue.

#### Product purpose

- Designed for easier manipulation with pallets and boxes.

#### Additions

- Possibility of delivery in different variations (different dimensions and surface finishings).
