

PRODUCT No. 7003

Metal hand pump

(Illustrative photograph)

Technical data

Material	Galvanized steel / plastic
Sealing	PVC / NBR
Weight	1,59 kg
Output	16 l/min
Connection	G2" and 3/4"
For barrels	60 - 216,5 l
Length of suction pipe	520 – 950 mm

Attributes

- Made of galvanized steel with plastic outlet knuckle fastened with an adapter nut.
- Manually operated pump for barrels from 60 l to 216,5 l of capacity.
- Designed for pumping of petroleum products, oil to viscosity of SAE 90 and diesel.
- Suction by telescopic metal tube to a depth of 480 – 900 mm.

Product purpose

- Designed for pumping of oils to viscosity of SAE 90 and diesel.

Additions

- Not suitable for pumping of aggressive chemicals, water and gasoline.
