

PRODUCT No. 3455

Station for waste bins – 2x plastic container (120/240 l)

(Illustrative photograph)

Technical data

Material	Washed concrete/steel sheet
Capacity	2x 120/240 l (plastic bin)
Weight (approx.)	850 kg
Width	1620 mm
Depth	880 mm
Height	1280 mm

Attributes

- Construction is made of washed concrete.
- The frame and doors are made of hot-dip galvanized steel sheet.
- Reinforced concrete construction with fixed door frame.
- Box doors are attached to the frame using pivot pins.
- The waste container is in a special cut at the bottom of the site.
- Bottom cut allows easy tilting of the container.
- Equipped with a steel cord to secure the containers against falling out.
- Designed for loading with a full 120 l or 240 l plastic container.

Color variations

- Construction (washed concrete – natural gray), frame and door (hot dip galvanized).

Product purpose

- Designed as a protective station for two 120 or 240 liter plastic containers.

Additions

- Can be supplied in two versions – type 3453 (for 1x – 120/240 l container), type 3455 (for 2x – 120/240 l container).
