

PRODUCT No. 3885

Plastic dripping tub – 109 l

(Illustrative photograph)

### Technical data

|          |                            |
|----------|----------------------------|
| Material | Recycled polyethylene (PE) |
| Capacity | 109 l                      |
| Weight   | 4 kg                       |
| Width    | 1194 mm                    |
| Depth    | 838 mm                     |
| Height   | 139 mm                     |

### Attributes

- Made of 100% recycled Polyethylene (PE).
- Chemically resistant seamless construction, does not corrode.
- Ribbing at the bottom of the tub increases rigidity in the event of leakage of substances, the liquids are not in contact with the container.
- Light weight, easy to carry.
- In case that the tub are not in use, it is possible to stack them into one another (only tubs of the same size).
- Applicable in temperature range from -34°C to +49°C.

### Color variations

- Standardly black.

### Product purpose

- Designed for containment of liquid leakages from smaller containers.
