

# **TECHNICAL DATA SHEET**

### PRODUCT No. 3940

## Round container for plants – 480 x 240

(Ilustrative photograph)

#### Technical data

Material Plastic (HDPE)
Weight 2,5 kg
Capacity (substrate/watering/water reserve) 17 / 8 / 2 I
Dimensions (diameter x height) 480 x 240 mm

#### **Attributes**

- For the individual container, it is necessary to order suitable elements for its anchoring or holder for hanging depending on where the individual pots will be placed.
- Made of high density polyethylene.
- High mechanical impact resistance, stable shape at temperatures from -65°C to +85°C.
- Mostly and commonly used to decorate town squares, city entrances, roundabouts or as separate landmarks.
- Can be applied on public lighting poles, railings, bridge structures, house facades, etc.
- Colored material ensures color stability, anti-grafity finish resistance against vandalism.
- Double-housing design of the container reduces watering evaporation, reduces the need for watering to almost half, thus reducing maintenance costs.
- Standard color green.
- Between the container walls is created a water supply, which is slowly used for gradual watering.
- Containers are equipped with overflow openings for the drainage of excess water and openings for draining reserve water for cleaning the hollow between the container walls.
- Rounded edges with shape of wave ensure perfect distribution of overhanging plants. UV stable, recyclable, 10 year warranty.

#### **Product purpouse**

- Most commonly used to decorate town squares, city entrances, roundabouts or a separate landmarks.
