

PRODUCT No. 3945

Rectangular container for plants – 700 x 200 x 275

(Illustrative photograph)

Technical data

Material	Plastic (HDPE)
Weight	3,7 kg
Capacity (substrate/watering/water reserve)	16 / 10,8 / 5,5 l
Dimensions (length x depth x height)	700 x 200 x 275 mm

Attributes

- For the individual container, it is necessary to order suitable elements for its anchoring or holder for hanging depending on where the individual pots will be placed.
- Made of high density polyethylene.
- High mechanical impact resistance, stable shape at temperatures from -65°C to +85°C.
- Mostly and commonly used to decorate town squares, city entrances, roundabouts or as separate landmarks.
- Can be applied on public lighting poles, railings, bridge structures, house facades, etc.
- Colored material ensures color stability, anti-graffiti finish – resistance against vandalism.
- Double-housing design of the container reduces watering evaporation, reduces the need for watering to almost half, thus reducing maintenance costs.
- Standard color – green.
- Between the container walls is created a water supply, which is slowly used for gradual watering.
- Containers are equipped with overflow openings for the drainage of excess water and openings for draining reserve water – for cleaning the hollow between the container walls.
- Rounded edges with shape of wave ensure perfect distribution of overhanging plants. UV stable, recyclable, 10 year warranty.

Product purpose

- Most commonly used to decorate town squares, city entrances, roundabouts or a separate landmarks.

Additions

- For individual containers, it is necessary to order suitable elements for anchoring or holders for hanging depending on where the individual containers will be placed.
