

PRODUCT No. 3931

Metal containers for waste separation with bottom dump – 2,5 m³

(Illustration photograph)

Technical data

Material	Galvanized sheet
Capacity	2,5 m ³ (2500 l)
Weight	250 kg
Load capacity	800 kg
Width	982 mm
Length	1928 mm
Height	1682 mm

Attributes

- Made of galvanized sheet – roof is hot-dip galvanized and varnished, sides are zinc-chromated.
- Designed for collection of separated waste.
- Lid colours are adjusted by the waste type (opening – paper – 940x93x275, glass and plastics – 160 mm diameter).
- Containers are emptied with bottom dump.
- Suitable for denser housing areas.

Color variations

- 3931-1 (Blue lid – paper waste collection)
- 3931-2 (Green lid – glass waste collection)
- 3931-4 (Yellow lid – plastic waste collection)

Product purpose

- Designed for collection of separated waste. The lid is colored depending on the kind of waste for which the container is designed (Paper, glass, plastics).
