

## PRODUCT No. 7212

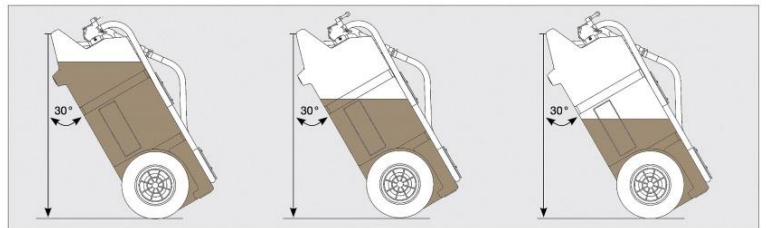

### Mobile pumping device for diesel oil with a pump – 12 V

(Illustrative photograph)

#### Technical data

Material	Polyethylene (PE)
Capacity	100 l
Weight	20 kg
Output	12 V – 30 l/min
Power cable	4 m
Wheels (diameter)	300 mm
Width	590 mm
Depth	1000 mm
Height	430 mm

#### Attributes

- Made of Polyethylene (PE).
- Equipped with an integrated handle and handgrips.
- Filling opening with integrated ventilation and integrated bracket for delivery nozzle.
- Equipped with wheels of 300 mm diameter – suitable for off-road terrain.
- Equipped with a breakwater for easier manual manipulation.
- Equipped with belt bulges for securing with belts during transportation.
- Equipped with an 12V, 30 l/min electric pump with automatic delivery nozzle and 3 m long delivery hose and 4 m long power cable.
- Approved for transportation for immediate consumption according to ADR 1.1.3.1 c).

#### Color variations

- Standardly grey.

#### Product purpose

- Designed for delivery and transportation of diesel fuel.

#### Additions

- Version with an electric pump.
