

PRODUCT No. 7280

Manually operated wing pump

(Illustration photograph)

Technical data

Material (sealing/pump)	NBR/cast iron/metal
Výtlač	0,25 l/lift
Output (approx.)	28 l/min
Connection	G2"
For barrels	200/220 l

Attributes

- Made of material NBR (rubber) for sealing, then cast iron and metal materials for pump.
- Pump is used in an industry.
- Rotary drum pump with high suction and resistance.
- After being informed by the manufacturer, the pump may be recommended for pumping of acetone.

Product purpose

- Designed for pumping of gasoline, cooling liquids, antifreeze, diesel fuel and oils to viscosity SAE 140.

Additions

- Before using for pumping other aggressive liquids/acids, it must be discussed with the manufacturer.
