

### PRODUCT No. 7298

#### Floor scale with an indicator – up to 300 kg

(Illustrative photograph)

#### Technical data

##### Scale:

Material construction/design/weighting surface	FE/steel/sheet metal
Weight	90 kg
Max. weighting (accuracy)	300 kg (100 g)
Operating temperature	-10°C/+40°C
Width	1000 mm
Depth	1000 mm
Height	90 mm
Certification	For non-commercial weighting (scale cannot be verified up to 300 kg)
Indicator:	
Material	Plastic
Power supply	AC 230V
Communication interface	RS-232
Operating temperature	0°C/+40°C
Display	LED, 20 mm
Dimensions	248 x 156 x 160 mm

#### Attributes

- The scale is made of varnished steel, 4 mm thick sheet metal and the indicator is made of plastic material.
- Suitable for dry conditions with operating temperatures from -10°C to a +40°C.
- The indicator can be used both from the mains and the built-in battery.
- Weighting program: piece counting, addition counting, weighting of animals, automatic addition and data sending.
- Weighting limit with upper and lower limit settings for weight tolerance.
- Indicator: a large LCD display (52 mm), readable from large distances and at an angle of 170°, fast setting, supplied with a plastic holder on a 38 mm diameter tube, tiltable, stable on table.

#### Product purpose

- Designed for weighting, for example when receiving or dispatching goods in a dry enclosed environment.

#### Additions

- The balance comes with an indicator.
