

PRODUCT No. 7299

Floor scale with an indicator – up to 600 kg

(Illustrative photograph)

Technical data

Scale:

Material construction/design/weighting surface	FE/steel/sheet metal
Weight	95 kg
Max. weighting (accuracy)	600 kg (200 g)
Operating temperature	-10°C/+40°C
Width	1000 mm
Depth	1200 mm
Height	100 mm
Certification	For commercial weighting
Indicator:	
Material	Plastic
Power supply	AC 230V
Communication interface	RS-232
Operating temperature	0°C/+40°C
Display	LED, 20 mm
Dimensions	248 x 156 x 160 mm

Attributes

- Made of quality coated sheet metal (4 mm thick) and varnished steel. Indicator is made mainly of plastics.
- Used for check-in or dispatch of products, warehouse inspection or production.
- The scale can be certified for commercial purposes.
- Indicator – operation from both the 230V mains and the built-in battery.
- Weighting modes: counting pieces, adding counts, weighting animals, automatic counting and data sending, limiting.
- Acoustic signal selection a ton outside the limit.
- Indicator – LCD display (52 mm), readable at an angle of 170°, fast setting on display.
- The indicator is supplied with a plastic holder on a 38 mm diameter pipe and can be tilted.
- It is possible that the indicator without the bracket is placed on the table

Product purpose

- Designed as the subject weight to determine the weight (weighting value) of the weighted material to be placed in the center of the weighting plate. We subtract the weighting value after reaching a stable value.

Additions

- The balance comes with an indicator.
