

PRODUCT No. 7534

Flowmeter for pneumatic pumps

(Illustrative photograph)

Technical data

Material	Plastic
Connection	½" BSP
Range of flow	1 – 10 l/min
Temperature range	-10°C to +50°C
Accuracy	0,3%
Max. operation pressure	100 bar
Viscosity range	20 – 2000 mPas

Attributes

- Made of plastic.
- Intended to be installed in the pipe or delivery nozzle.
- For liquids – oils, brake fluids and other fluids.

Product purpose

- Designed for installation into pipe or delivery nozzle for oils, brake fluids and other fluids.
