

PRODUCT No. 3391

Anti-fatigue mat – Deck plate 0,9 x 6 m

(Illustrative photograph)

Technical data

Material	Vinyl / PVC
Weight	32 kg
Color	Black
Surface (thread)	„Diamond“
Operating temperature	0°C / +60°C
Width	900 mm
Length	6000 mm
Height	14 mm

Attributes

- Made of PVC foam with vinyl top layer.
- Two-layer anti-fatigue mat designed for demanding operations.
- The surface of the mat is obtained with a vinyl layer that is attached to the PVC foam layer.
- The foam layer reduces fatigue during long standing and isolates from the cold floor.
- The surface of the mat is resilient to standard industrial chemicals.
- Any spilled chemicals must be removed immediately from the surface of the mat.
- Obtained with bevelled edges.

Color variations

- Black.

Product purpose

- Designed for dry, demanding operations for relieving fatigue during long-standing operations.

Additions

- Suitable for dry operations only.
