

PRODUCT No. 7711

Trapping wrap for a pallet - flexi

(Illustrative photograph)

Technical data

Material	Polyethylene (PE-LLD)
Capacity	250 l
Weight	17 kg
Load capacity	1000 kg
Load	2x 220 l barrel
UV stability	UV8
Width	1100 mm
Length	1500 mm
Height	440 mm

Attributes

- Made of chemically resistant plastic material of low density linear polyethylene (PE-LLD).
- Suitable to be used in an industrial operations.
- The material is chemically resistant to impacts of most chemicals.
- Specially designed squeezable front part allowing to insert a pallet with barrels or cans into the wrap.
- Maximum size of the pallet is 1200 x 800 mm.
- Using wrap is possible only together with a bottom pallet with its size 1200 x 800 mm.
- Pallet serves as a support for stored containers or allowing its total handling.

Color variations

- Yellow.

Product purpose

- Designed for storage and capture of liquid leaks of up to two 220 l barrels in interior and exterior environments.

Additions

- The catching basin can be for a particular chemical only recommended. Approval for use for particular substance with a particular concentration and storage in a particular environment may only be granted when the safety data sheet of the substance is reviewed by a safety technician or a designated facility.
