

PRODUCT No. 7755

Nádrž na použitý kuchyňský olej 800 l – Oliv box

(Illustrative photograph)

Technical data

Material	HDPE
Capacity	800 l
Weight	66 kg
Width	1400 mm
Depth	1150 mm
Height (tank/total)	1250 / 2350 mm

Attributes

- Made of high density polyethylene (HDPE).
- High capacity container designed solely for collection of used kitchen oil in PET bottles – without direct pouring of the oil.
- Containers shape allows easy handling by means of a fork-lift machinery.
- The containers lid is equipped with a security lock.
- Containers protection against overturning is ensured by means of steel elements anchored to the ground.
- The HDPE material is resistant to UV radiation and weather influences.
- Standardly delivered with English stickers (can be delivered with stickers in different language on demand).
- **Method of emptying the tank:** the tank is suitable for collection yards and other facilities equipped with fork-lift machinery with a rotational fork device. The tank does not contain any inner tank and in the lower part is equipped with openings for loading forks. After filling, the tank is transported to the collection point and lifted then turned over by means of a rotational device, which dumps PET bottles with used cooking oil. As alternative the tank can also be equipped with a custom-made so-called big bag with loops or similar container (this solution is arranged by the customer individually depending on his needs). The PET bottles are then collected in a bag/container which is removed and emptied after filling, e.g., by a handling crane.

Color variations

- Yellow.

Product purpose

- Designed for collection of used kitchen oil in PET bottles.
