|----------|--------------|
| Material | Wood / metal |
| Weight | 8 kg |
| Width | 1200 mm |
| Depth | 800 mm |
| Height | 200 mm |

Attributes

- Made of wood and metal material.
- Foldable extension enclosure for EURO pallet with dimensions of 1200 x 800 mm.
- They stack on top of each other up to desired height.
- The enclosure is provided with metal joints for distribution.
- Joints are provided with overlaps for stable placement on the EURO pallet.
- Protects goods and material from environmental influences and ensures stability of the contents on the pallet.
- Second quality product (the wood is not perfectly dried and there may be signs of mold damage due to excessive moisture).

Product purpose

- Designed to protect and to stable stored goods and materials on the EURO pallet.

Additions

- One piece for one level – they are stacked on each other up to desired height.
- Possibility to order a wooden lid (type 7886) to create a wooden box.
