

PRODUCT No. 3343

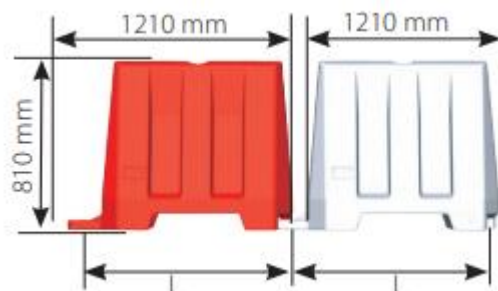

Road barrier – white

(Illustrative photograph)

### Technical data

Material	Polyethylene
Weight	8 kg
Length (L)	1010 mm
Width	400 mm
Height	810 mm

### Attributes

- Made of polyethylene.
- High service life – thanks to sturdy and solid structure, quality polyethylene and modern production technology.
- Resistant to mechanical damage and weather conditions (UV stable – high color retention under long solar radiation).
- Lightweight design, product does not corrode, does not contain any metal parts.
- Equipped with a hole on the side for easy filling and emptying and as a protection against overflow.
- Connecting other parts is possible thanks to connection elements – possibility to make a row of barriers or in angles.
- Original and modern design – good visibility for drivers.
- In case of need the barriers can be weighted down – with water or sand.
- Profiled bottom ensures stability both of individual barriers and all the line.

### Color variations

- White.

### Product purpose

- Designed for fast and easy marking of road changes and redirection of road traffic.

### Additions

- Dimensions of the product may vary in range of +/- 1% because of production process and attributes of the material.
