

PRODUCT No. 7925

Holder for high capacity bag (pair)

(Illustrative photograph)

Technical data

Material	Steel
Weight	8 kg
Load capacity of the set	200 kg
Bracket length	1220 mm
Bracket size	50 x 50 mm
Bracket plate	240 x 150 mm
Diameter of hole in flange	13 mm
Numbers of holes in one flange	2x

Attributes

- Made of low carbon steel (S235JRH).
- Wall holder for high capacity bags.
- Suitable for example for disposal of sorted waste in collection yards, manufacturing plants, etc.
- The holder consists of bracket, flange, beam and hook for attaching the bag.
- The brackets are not connected to each other, therefore it is possible to create a required distance.
- Possibility to order different length of beams for attaching various types of bags.
- There are two holes of 13 mm diameter on each flange for fixing to the wall with eg. dowels and screws.
- Suitable for indoor use or partially covered areas against weather conditions.
- The surface finishing is made by powder paint coating for the whole set.

Color variations

- Standardly blue (RAL 5017).

Product purpose

- Designed for attaching the high capacity bag.

Additions

- Delivered in pair.
- Delivered without fixing material.
