Transportation box for tools

(Illustration photograph)

Technical data

| | |
|----------|-------------------|
| Material | Polyethylene (PE) |
| Capacity | 200 l |
| Weight | 16 kg |
| Width | 990 mm |
| Depth | 550 mm |
| Height | 590 mm |

Attributes

- Made of recyclable Polyethylene by rotary molding method.
- Resistant to UV radiation, mechanical damage and atmospheric conditions.
- Box has a sturdy structure that protects it against water penetration into the inner space of the box.
- The lid is hinged on 3 robust hinges.
- The construction of the hinges allows the lid to be opened even when the box is placed close to a wall.
- Rounded shape ensures drainage of rainwater.
- Possibility of manipulation with boxes with a fork-lift machinery or with holders on side.
- Equipped with special recesses for convenient and safe stacking of boxes – maximum of 3 pieces.
- The box has two steel buckles – they allow padlocks to be used.
- Due to appropriate dimensions, the box is suitable for transportation by vehicle.
- Boxes are suitable for storing and transporting various tools and other small accessories.

Color variations

- Standardly black color.

Product purpose

- Designed for storing and transportation of various tools and other small accessories.

Additions

- Five years warranty.
