

### PRODUCT No. 1020-A

#### Metal stand for bags

(Illustrative photograph)

#### Technical data

Material	Steel sheet
Capacity	120 l
Weight	5,5 kg
Width	575 mm
Max. diameter	680 mm
Height	920 mm

#### Attributes

- Made of hot-dip galvanized steel sheet grade 11.
- The bin is designed as a triple feet cone-shaped frame.
- The support part consists of three vertical columns – connected by upper and lower profiled hoop.
- Inside the upper profile as a flexible hoop – it serves to fasten polyethylene bags.
- Simple and quick snapping of bags allows easy handling of waste.
- Polyethylene bags can also be ordered – they are not included.
- All types have lids made of hot-dip galvanized sheet with a diameter of 462 mm.
- Without the lid, the upper diameter is 440 mm and the lower one is 680 mm.
- Suitable for outdoor use, eg. at parking lots and gas stations.

#### Product purpose

- Designed for attaching of polyethylene bag and collecting of common waste.

#### Additions

- Polyethylene bags are not included.
- Can be stacked by 5 pcs.
- Bag can be ordered – type 1077 (700 x 1100 mm).
