Attributes

- Post is made of plastic material and a tap made of aluminium.
- Garden water post with a tap, which is included.
- Allows easy and comfort pumping of water in the garden.
- Its appearance imitates granite or marble.
- For gardens it is not only a practical solution, but also a decoration.
- Possibility of anchoring with screws or free seating (screws are not included).
- Water intake is obtained by connecting regular garden hose with a quick connection or to a rainwater tank.
- The water supply hose is connected on a back side of the post.
- Inside the post is a hose that distributes the water to the lever tap.

Color variations

- Dark grey.

Product purpose

- Designed to ensuring water pumping in a garden.
