

### PRODUCT No. 8104

### Container for collection of kitchen waste

(Illustrative photograph)

#### Technical data

Material	Polypropylene (PP)
Capacity	15 l
Weight	3,6 kg
Diameter	285 mm
Height	400 mm

#### Attributes

- Made of plastic material polypropylene.
- Modern storage container for kitchen waste residues suitable for kitchens of all sizes.
- Used as a home composter.
- The container is equipped with a sieve at the bottom to separate the solid and liquid content of the waste.
- Liquid substances can then be drained using the tap.
- Equipped with a handle for comfortable carrying of the container.
- Equipped with a tap, a lid with a hermetic closure and an internal sieve.
- Supplied in white container and green lid design.
- Supplied with a spray for acceleration of the transformation process of the bio waste.

#### Colour variations

- Container / lid – white / green.

#### Product purpose

- Designed for home composting.

#### Additions

- Before first usage, it is recommended to cover the sieve with a paper towel to prevent clogging of the tap.
- Before first usage, it is recommended to check the functionality of tap by pouring water into container and draining it.
- It is recommended to drain the liquid content regularly (every day).
