

PRODUCT No. 8155

Mobile pump station for AdBlue – 210 l

(Illustrative photograph)

Technical data

Material	Polyethylene (PE)
Capacity	210 l
Weight	20,5 kg
Output	25 l/min
Delivery hose (length)	4 m
Width	785 mm
Depth	595 mm
Height	685 mm

Attributes

- Single-casing tank made of polyethylene approved for AdBlue®.
- Used for transportation and pumping of AdBlue®.
- Structure designed for manipulation – offsets for fixation of strap belts for fastening during transport.
- Equipped with offsets for fork-lift machinery with integrated stacking bolts and handles.
- Equipped with integrated holder for delivery nozzle.
- Pressure ventilation.
- Self-suction electric pump with an output of 25 l/min, 12 V, 4 m long power cord with clamps.
- Equipped with 4 m long delivery hose.

Color variations

- Blue.

Product purpose

- Designed for pumping of AdBlue®.

Additions

- Delivered with hinged lid.
- Urea solution (AdBlue®) is not classified as a dangerous substance – transport is not subjected to ADR approval.
