

### PRODUCT No. 8200

#### Plastic catching basin for pallet – with a plastic grate

(Illustrative photograph)

#### Technical data

Material	Polyethylene (PE)
Capacity	220 l
No. of barrels	2x
Weight	21,5 kg
Load capacity	600 kg
Width	1230 mm
Depth	830 mm
Height	390 mm

#### Attributes

- Made of high-quality polyethylene (PE).
- Basin construction is designed according to accurate dimensions of 200 l barrels.
- Designed for ecological storage of water polluting substances by space saving and safe way.
- Catching basins have high chemical resistance.
- Basin can be placed directly on the ground.
- Basin is equipped with fork-lift depressions in the bottom part.
- Handling is possible to be carried out by fork-lift machinery from all four sides.
- Suitable for placing a Euro pallet (1200 x 800 mm) or plastic pallet of similar dimensions.
- Barrels are stored directly on the plastic grate which is placed on the basin.
- Using steel or plastic grate is not required.

#### Colour variations

- Black.

#### Product purpose

- Designed for storing barrels with liquids.

#### Additions

- Possibility of ordering basin without a grate (type: 8199).
- Supplied without euro pallets.
