

PRODUCT No. 8209

Submersible pump for barrel PSDR250PS

(Illustrative photograph)

Technical data

Material	Plastic
Weight	4,5 kg
Max. flow	2,5 m ³ /hour
Max. discharge height	9 m
Voltage / frequency	230 V / 50 Hz
Output	250 W
Connection	3/4"
Max. submersion depth	7 m
Max. liquid temperature	35 °C
Max. size of dirt particles	0,5 mm
Cable length	10 m
Dimensions (H x W x L)	280 x 185 x 180 mm

Attributes

- Submersible plastic pump with flexible hose and float switch.
- The pump is designed for pumping clean and slightly polluted rainwater with a maximum particle size of up to 0,5 mm.
- Use for submersion into a barrel or a tank and subsequent pumping or irrigation of the garden.
- For liquids up to 35 °C of temperature.
- Equipped with a 50 Hz single-phase motor and a 10 m long power cable.

Product purpose

- Designed as a submersible pump for pumping clean or slightly contaminated water.
