

PRODUCT No. 8214

Submersible garden automatic pump PMC1004PA

(Illustrative photograph)

Technical data

Material	Stainless / plastic
Weight	11 kg
Max. flow	6 m ³ /hour
Max. discharge height	45 m
Voltage / frequency	230 V / 50 Hz
Output	1000 W
Connection	1"
Max. submersion depth	7 m
Max. liquid temperature	35 °C
Max. diameter of coarse dirt	1 mm
Cable length	15 m
Nylon rope length	15 m
Dimensions (diameter x height)	140 x 535 mm

Attributes

- Plastic submersible pump with stainless casing and built-in automatic control.
- Suitable for draining clean or slightly contaminated drainage water with max. size of particles up to 1 mm.
- For pumping drainage water from cellars and tanks, for irrigation or pumping from tanks, etc.
- For liquids up to 35 °C of temperature.
- Equipped with a 15 m long power cable and 15 m long nylon rope.

Product purpose

- Designed as a submersible pump for pumping clean or slightly contaminated water.
